A DIVISION OF YORK BUILDING PRODUCTS

live outside.

WALLS

PAVERS

EXTRAS

THERE IS AN ART AND A SCIENCE TO LIVING OUTSIDE. CREATING AN **EXPERIENCE SO PERFECT** YOU'LL NEVER WANT TO GO BACK INSIDE TAKES MORE THAN A TRADITIONAL HARDCAPE MENTALITY.

IT TAKES A LOVE OF NATURE SO STRONG YOU CAN **TASTE IT** AND **SMELL IT** AND **FEEL IT IN YOUR DNA.** IT TAKES **A CRAFT BREWER'S PASSION** FOR HARDCAPES THAT BORDERS ON OBSESSION. **IT TAKES A WHOLE NEW WAY OF THINKING** ABOUT PAVERS AND WALLS.

WE CALL IT PAVEOLOGY, AND IT'S THE DIFFERENCE BETWEEN LIKING YOUR NEW OUTSIDE ENVIRONMENT AND **LIVING IT.**

*live
outside.*

Specifications (Pages 78-81)

The Chesapeake Bay and its rivers and streams are incredibly special to us at NewLine. From crabbing and fishing to water-skiing to simply relaxing with the family and taking in the views, each of us at NewLine shares a similar passion for this gorgeous and serene body of water.

Unfortunately, with environmental stress and increased development, the natural water filtration provided by the soil is diminishing. In turn, increasing amounts of storm water runoff — mixed with motor oil, fertilizers and other contaminants — are polluting lakes, rivers, coastlines, groundwater and, of course, our own Chesapeake Bay.

We believe that more should be done to preserve this vital watershed. Therefore, NewLine Hardscapes is proud to support the Chesapeake Bay Foundation (CBF) to help protect and restore the Chesapeake's natural resources. CBF is working to ensure the recovery of rivers, streams and the Bay for the benefit of the more than 17 million people living in the region, the thousands of species of wildlife and future generations.

Moving forward, NewLine will donate a percentage of our proceeds to CBF for every square foot of our permeable interlocking concrete pavers (PICPs) that are manufactured and sold either residentially or commercially. PICPs are important in this fight because they help filter pollution from stormwater runoff as well as reduce runoff from rainstorms by as much as 100 percent. Rooted in our live outside philosophy and compelled by our care for this wonderful natural resource, our mission at NewLine is to “give back to the Bay” at every opportunity. We hope you can join us in this mission.

The Blue Crab logo is part of our “NewLine Cares” effort, which shows our support of the Chesapeake Bay and our environment in general. Look for the Blue Crab logo next to all of our permeable paver products.

MOVING THE INDOORS OUTSIDE

Lay a foundation that not only improves the value and aesthetic appeal of your home, but one that invites you and your family to enjoy the great outdoors. With classic shapes, bold colors and distinctive textures, NewLine's premium pavers can transform your outdoor living space and set the stage for backyard parties, cookouts or just plain relaxing... for years to come.

PAVER FINISHES

Different tastes mean different needs in selecting your hardscape products. We help make the process easier by providing our pavers with a variety of face finish options. Whether it's smooth, textured, clean or antiqued, we have the look you need.

CHAMFERED

A classic finish that is characteristic of traditional brick. Features beveled edges.

- Holland Stone™
- Aqua-Flo™
- Enviro-Flo™

TEXTURED/AGED

This finish includes both a textured relief to the face, as well as an antiquing process, aging it to appear like old cobblestones.

- Carriage Stone™
- Carriage Stone™ Circle kit
- Carriage Stone™ Large Square

AGED

Provides a time-worn, weathered effect to the look of the paver.

- English Cobble™
- English Cobble™ 4-Piece
- English Cobble™ Circle Kit

SLATE

This specialty finish gives the patio tile a texture similar to Pennsylvania Bluestone or slate.

- York Tile™
- Terrace Stone™

TRADITIONAL

With rounded "pillowed" edges, the traditional finish provides a soft, padded appearance to the paver.

- Classic Cobble™
- Classic Cobble™ 4-Piece
- Classic Cobble™ Circle Kit
- Alleyway Cobble™

TERRACE STONE™

SHOWN | fieldstone

CLASSIC COBBLE™

Our most popular paver, the Classic Cobble™ in 6 x 6 and 6 x 9 provides incredible ease of use and flexibility of design. And with soft, rounded corners and a domed “pillow top” surface, Classic Cobble delivers an Old World feel. The two sizes are sold separately, but often are used together in a variety of patterns.

CLASSIC COBBLE™

SHOWN | pewter

TURFSTONE™

Turfstone™ is a thick, square slab with open grids that allow water to permeate through the system. Turfstone can be used for overflow parking, fire lanes, erosion control and parking lots where permeable paving is required. The open voids can be filled with drainage aggregate for maximum infiltration or soil to allow greenery to grow.

NOTE: Soil and turf will reduce the permeability of the system but will enhance the overall look and appearance.

HIGHLAND STONE®

RETAINING WALL

SHOWN | coastal tan

SHOWN | palmetto, coastal tan, fieldstone mix

HIGHLAND STONE® RETAINING

Always a favorite, the Highland Stone® retaining wall system has more options, so you have more versatility. By alternating the height (3" or 6") or width (6", 12" or 18"), the stones can be randomly positioned, creating a handcrafted and cobbled look. For a more formal look, select a uniform size and shape.

MIRASTONE®

This two-piece system can be used to create a wide range of attractive and structurally sound garden or landscaping walls. Each lightweight unit has a large, hollow-core SecureLug® connection and tapered sides, allowing for durability, flexibility and easy installation. One unit is a straight face, and the other is a scored face, lending a random ashlar pattern appearance to your wall project.

ACCESSORIES THAT MAKE A DIFFERENCE

When it comes to details, NewLine leaves no stone unturned. We offer a variety of hardscape accessories such as steps, fire pits, wall caps and column caps to add style and elegance to your new patio or walkway, so that you can appreciate even the tiniest details of living outside.

Important Note:

Burning large items or trash in fire pits may cause damage to block units. Our fire features are designed strictly for small campfires.

NewLine recommends using a steel insert to protect block and coping units. Failure to use an insert could cause damage to the block or coping.

CAPS, STEPS, TREADS & TABLES

ROCK FACE CAPS

Our rock face column caps are available in three sizes to fit both large and small columns. The 30" x 30" is ideal for the larger block units. The 22" x 22" pairs perfectly with our Yorkshire™ Wall, while the 28" x 28" works well with the Napa™ wall.

These rock face caps come with a flat top or a light top in three colors: charcoal, mocha and sand. You can easily pair this product with our 48" wall caps and step treads, as they have the same chiseled look and are available in matching colors. The light-top column caps also have a pre-drilled knock out, so they're ready to be installed with fixtures.

NEW for 2016!

NewLine's Aqua-Chip™ drainage aggregate for permeable paver systems. Available in gray or tan in 50lb. bags and Super-Sacks.

COLOR

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books and online photos. However, NewLine cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. NewLine always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

EFFLORESCENCE

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powderlike deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. NewLine includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. NewLine does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence-removers. Before purchasing or applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

POLYMERIC HAZE

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. NewLine accepts no responsibility or liability for this occurrence.

CONSTRUCTION RESIDUE

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can

also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. NewLine accepts no responsibility or liability for these occurrences.

COMPACTOR AND SNOW REMOVAL

NewLine pavers with textured surfaces have high and low points on the surface that give it more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the NewLine pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that also can be used for this purpose. For further information on interlocking concrete paver details, technical information and recommended construction practices, visit ICPI at www.icpi.org.

A plate compactor should not be used on our York Tile or Overlay pavers. Also, snow removal equipment should have the proper spacing, bumpers and rubber blade guards to protect the surface of the pavers. NewLine will not be held responsible for damage caused by the misuse of compaction or snow removal equipment which leaves scuff marks or burns on pavers.

HARDSCAPE LIFETIME TRANSFERABLE WARRANTY

NewLine Hardscapes backs our manufactured paver and wall products with a lifetime transferable warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only, and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this transferable warranty with a proof of purchase (invoice or delivery ticket).

NOTE: This warranty does not apply to any breakage, chipping or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA and recognized work procedures. Please visit www.icpi.org or www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligible act on the part of the purchaser, owner of the building, installer or any third party.
